Convert Saved Quick Reports and Queries

It is easy to convert saved Quick Reports and Queries from one platform to another. This allows various reports and queries to be shared between users independent of each user's platform.

MAC to PC

To convert MAC files to PC files, simply add the following extensions to the appropriate saved items:

> Quick Report: add .4QR (example Quick_Report.4QR)
> Query: add .4DF (example Query.4DF)

PC to MAC

Download the **4DFileTypeConv.sea.bin** file from the following website:
> *http://nasatechtracs.support.knowledgesharing.com/html/utilities.html*

Double click on the **4DFileTypeConv.sea.bin** file, located on the desktop. A folder, 4D File Type Conversions will be placed on the desktop. There are two scripts in the folder that will allow the user to drag and drop the PC file onto the icon and it will be converted to a MAC file.

> Quick Report: 4DQuickReportMaker
> Query: 4DQueryMaker
